FROM THE SECRETARY'S DESK

Hi again. Isn't it a great time of year? The weather is great - the birds are singing, the trees are blooming, it's just gorgeous.

Another great run today. I would like to take this opportunity to thank both Julie and Craig Bloomfield for all their hard work for this run. Graeme and I were supposed to help in the organisation of this run but we unfortunately did not help at all with work and family commitments. Julie and Craig did a great job - thanks guys. Despite the yucky weather it was terrific to see so many of you turn up today.

Well, next month is our last run for the year - after that it is the AGM and the Xmas (oh my goodness - it sure does come around quickly doesn't it??). I would like to remind ALL MEMBERS that all positions will become vacant at the AGM, so please think about who you would like to nominate for positions for next year.

I have put together a few more "useless titbits" and hope you enjoy them.

- In the last five years, Britons have seen a 38% rise in repetitive strain injury of hands and wrists. The cause? Text messaging on mobile phones.
- Australians recycle nearly 2 billion newspapers every year.
- Almost 1 in 5 people sleep less than 6 hours per night.
- 30% of women think you can date only one person to find "the one". 30% of men want to date 20 or more women before settling down.
- To succeed in life, you need three things - a wishbone, a backbone and a funny bone.
- The only way you can know where the line is, is if you cross it.
- The word **Listen** contains the same letters as **silent**.
- How much do pirates pay to have their ears pierced? - A buck-an-ear.
- How did the pirate stop smoking? - He used the patch.
- How do pirates navigate? - They use the staaaaaaarrrs
- More bad news for pessimists. According to the latest study, **optimists live longer**.
- A Freudian slip is when you say one thing, but mean your mother.
- The Korean scientist who admitted to faking his cloning research results is now saying that it wasn't his fault - he blames his evil twin.

Well that's it for me folks. Until next time drive safely, look after each other and keep smiling.

Cheers

Denise.

Can You Solve This?

You are on a horse, galloping at a constant speed.

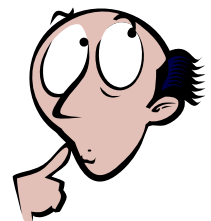

On your right side is a sharp drop off and on your left side is an elephant traveling at the same speed as you.

Directly in front of you is a galloping kangaroo and your horse is unable to overtake it.

Behind you is a lion running at the same speed as you and the kangaroo.

What must you do to safely get out of this highly dangerous situation?

If you cannot solve this, the answer is hidden within this edition of the SCN. See if you can find it!

Description: *Locomobile with James Trackson at the tiller with his mechanic leaving Parliament House after the steam car had been inspected by special request by the Governor of Queensland, Sir Henry Norman. The steam powered Locomobile was manufactured in the USA between 1899 and 1903. James Trackson was a pioneer of Queensland motoring, and imported this car, quoted in many sources to be the first car in Queensland. Mr Trackson's steam car was reportedly not popular with the authorities, who applied the by-laws on the running of steam rollers to his car, requiring a man to walk ahead of it with a red flag. This may have been the reason for his visit to the Governor!*
